DATE MAILED: 10/18/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/899,645	Applicant(s) LI ET AL.	
	Examiner Russell Kallis	Art Unit 1638	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 5-8, 10-14, 17, 21, 22, 24-30 and 37-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 21, 22 and 24-30 is/are allowed.
- 6) ☒ Claim(s) 5-8, 10-14, 17 and 37-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims 1-3 are cancelled. Claims 37-39 are newly added. Claims 5-8, 10-14, 17, 21-22, 24-30 and 37-39 are pending and examined.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Rejection of Claims 1-3 under 35 U.S.C. 102(e) is withdrawn in view of Applicant's amendments.

Rejection of Claims 5-8, 10-14, 17, 21-22, and 24-30 under 35 U.S.C. 112, first paragraph, is withdrawn in view of Applicant's amendments.

Rejection of Claims 5-8, 10-14, 17, 21-22 and 24-30 under 35 U.S.C. 112, second paragraph is withdrawn in view of Applicant's amendments.

Claim Rejections - 35 USC § 112

Claims 5-8, 10-14, 17 and 37-39 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method of decreasing β -oxidation in a plant by introduction of an acyl-CoA thioesterase wherein the level of acyl-CoA thioesterase is increased and the level of oil is increased, does not reasonably provide enablement for a method of both decreasing or increasing β -oxidation in a plant by introduction of an acyl-CoA thioesterase wherein the level of acyl-CoA thioesterase is decreased and the level of oil is increased or an oil constituent in a plant. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims.

The claimed invention is not supported by an enabling disclosure taking into account the *Wands* factors. *In re Wands*, 858/F.2d 731, 8 USPQ2d 1400 (Fed. Cir. 1988). *In re Wands* lists a number of factors for determining whether or not undue experimentation would be required by one skilled in the art to make and/or use the invention. These factors are: the quantity of experimentation necessary, the amount of direction or guidance presented, the presence or absence of working examples of the invention, the nature of the invention, the state of the prior art, the relative skill of those in the art, the predictability or unpredictability of the art, and the breadth of the claim.

Applicant broadly claims a method for decreasing β -oxidation in a plant transformed with a nucleic acid encoding an acyl-CoA thioesterase whereby the level of acyl-CoA thioesterase is decreased or increased and the level of oil in the plant is increased.

Applicant teaches SEQ ID NO: 1 encoding SEQ ID NO: 2; and the specification provides guidance for methods of transforming and introducing DNA into a plant; methods of modulating acyl-CoA thioesterase activity; and methods of measuring β -oxidation and oil constituents in a plant.

Applicant does not teach a method of both increasing or decreasing acyl-CoA thioesterase expression in a plant that results in the decrease of β -oxidation and an increase in the level of oil or an oil constituent in a plant.

The state-of-the-art is such that one of skill in the art cannot predict whether both increasing and decreasing will result in the decrease of β -oxidation and an increase in the level of oil or an oil constituent in a plant. The unpredictability lies in the simple fact that in order for β -oxidation to increase, resulting in decreased oil levels, the activity of the acyl-CoA thioesterase

Art Unit: 1638

must be limited; and for β -oxidation to decrease, resulting in increased oil levels, the activity of the acyl-CoA thioesterase must be increased (Harwood, J. L. *et al.* Biochemica et Biophysica Acta, 1996; Vol. 1301; pp. 7-56; see page 43, column 2, lines 3-5).

Given the lack of guidance in the instant specification, undue trial and error experimentation would be required for one of ordinary skill in the art to determine how to both increase or decrease acyl-CoA thioesterase activity such that either level of activity would result in a plant having decreased β -oxidation and an increased level of oil or oil constituent.

Therefore, given the breadth of the claims; the lack of guidance and working examples; the unpredictability in the art; and the state-of-the-art as discussed above, undue experimentation would be required to practice the claimed invention, and therefore the invention is not enabled throughout the broad scope of the claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1638

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Claims 5-8, 10-14, 17 and 37-39 are rejected.

Claims 21-22 and 24-30 are allowed

Art Unit: 1638

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell Kallis whose telephone number is (571) 272-0798. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on (571) 272-0804. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
